

SUBMERSIBLE SUMP PUMPS FOR DRAINING CLEAR WATER

The DRENOX series pumps are built entirely in AISI 304 stainless steel. Cooling of the motor is via a heat exchange chamber that allows the machine to work for long periods when not completely submerged.

Design Features

- Stainless steel pump casing
- Stainless steel suction grid
- Cast stainless steel impeller (technopolymer on request for model 80/7)
- 10 m H07 RN-F power supply cable with plug
- Fixed double NBR 70 rubber seal with special sand guard V-ring
- Oil chamber for seal lubrication
- Stainless steel shaft with a ceramic facing at the points of seal wear
- Equipped with 32 mm ø rubber holder
- Supplied with float level switch in the AUTOMATIC versions
- Suitable for continuous use

Motor

- Dry motor with stainless steel casing
- Level of protection IP68
- Class F insulation
- Single phase power supply with capacitor permanently activated and thermal protection built into the motor winding
- Three phase power supply with external protection provided by the user
- Completely insulated cable connection chamber
- Self-lubricating ball bearings
- Speed of rotation 2850 rpm

Usage Limitations

- Type of liquid: partially effluent and dirty clear water, non-aggressive liquids
- Maximum liquid temperature 40°C
- Maximum submersion under the water level 7m
- Minimum drainage level 3 mm for model 80/7, 35 mm for the remaining models (manual version)
- Free clearance of solids 3 mm for models 80/7, 6 mm for the remaining models

Applications

- Drainage of seepage water, pumping of rain water, from a grating or drain, pumping of domestic waste water, drainage of environments, bathing and swimming pools, industrial applications
- Fountains and water features
- Surface irrigation
